An Inter-Cultural and Inter-Sectorial Project

by
Dragoș A. Cantea

WHY IASI?

The international and European approach of the city is more and more visible, and the festival will promote the same value set according to this direction.

History recommends Iași to be the host of such a festival that would put the city back in the international spotlight again, under the auspices of the festival's partners, such as Nordic and European companies, embassies, chambers of commerce, cultural centres, universities and international press agencies.

Classix Festival is an independent festival organized from the belief that Iași deserves and needs another landmark on the cultural map of the country.

The festival is **innovation oriented**. Classical music will be put into a new perspective through this series of concerts in an interdisciplinary approach between many artistic fields.

CONCLUSIONS:

The Roles of Musicians as Programme Developers

- Create interdisciplinary teams;
- Create a personal platform for artistic development;
- Establish your own artistic profile;
- Establish a certain value chain between your partners.
